# DigiKeyer and DXLab Suite setup

Router setup:

Note: The absolute port numbers do not matter. The key is consistency - the same port number must be used for a specific function every time it is used.

1. Assign the radio control virtual COM port.

2. Assign a port for CW – CW cannot share a port with any other function.

3. Assign a port for FSK – check the PTT box.

4. Assign the same port for PTT as you assigned for Control.

5. Save settings to a preset by selecting menu **Preset | Save as.** Choose a position and name it DXLab.

CI-V Commander setup:

1. Click **Config** and select the **Ports tab** …

2. Select the virtual COM port you used for control in Router's Ports tab

3. Select the Baud Rate, Parity, Word Length, and Stop Bits settings required by your radio.

4. Set DTR "always off"

5. Set RTS "on to xmit" - this is PTT

WinWarbler setup:

Note: It is important to execute the following steps in order. Otherwise PTT, FSK and CW sharing will not operate properly.

This configuration is for WinWarbler with Commander. To configure and run WinWarbler in stand-alone mode or with another logger, see the separate *DigiKeyer WinWarbler Setup Guide*.

The user has the option to configure WinWarbler for either FSK or AFSK. Configuration information is provided for both options.

1. Click **Config** and select the **PTT tab** …

2. Select "Xcvr Ctl SW" as the Mode. WinWarbler will direct commander to assert PTT in Phone (Voice) and PSK modes.

3. Select the port you defined for FSK in the "Port" box. This will be used for MMTTY FSK and PTT.

4. Select the Soundcard Tab

5. Choose the USB Audio CODEC to use for PSK (DigiKeyer does not support Phone).
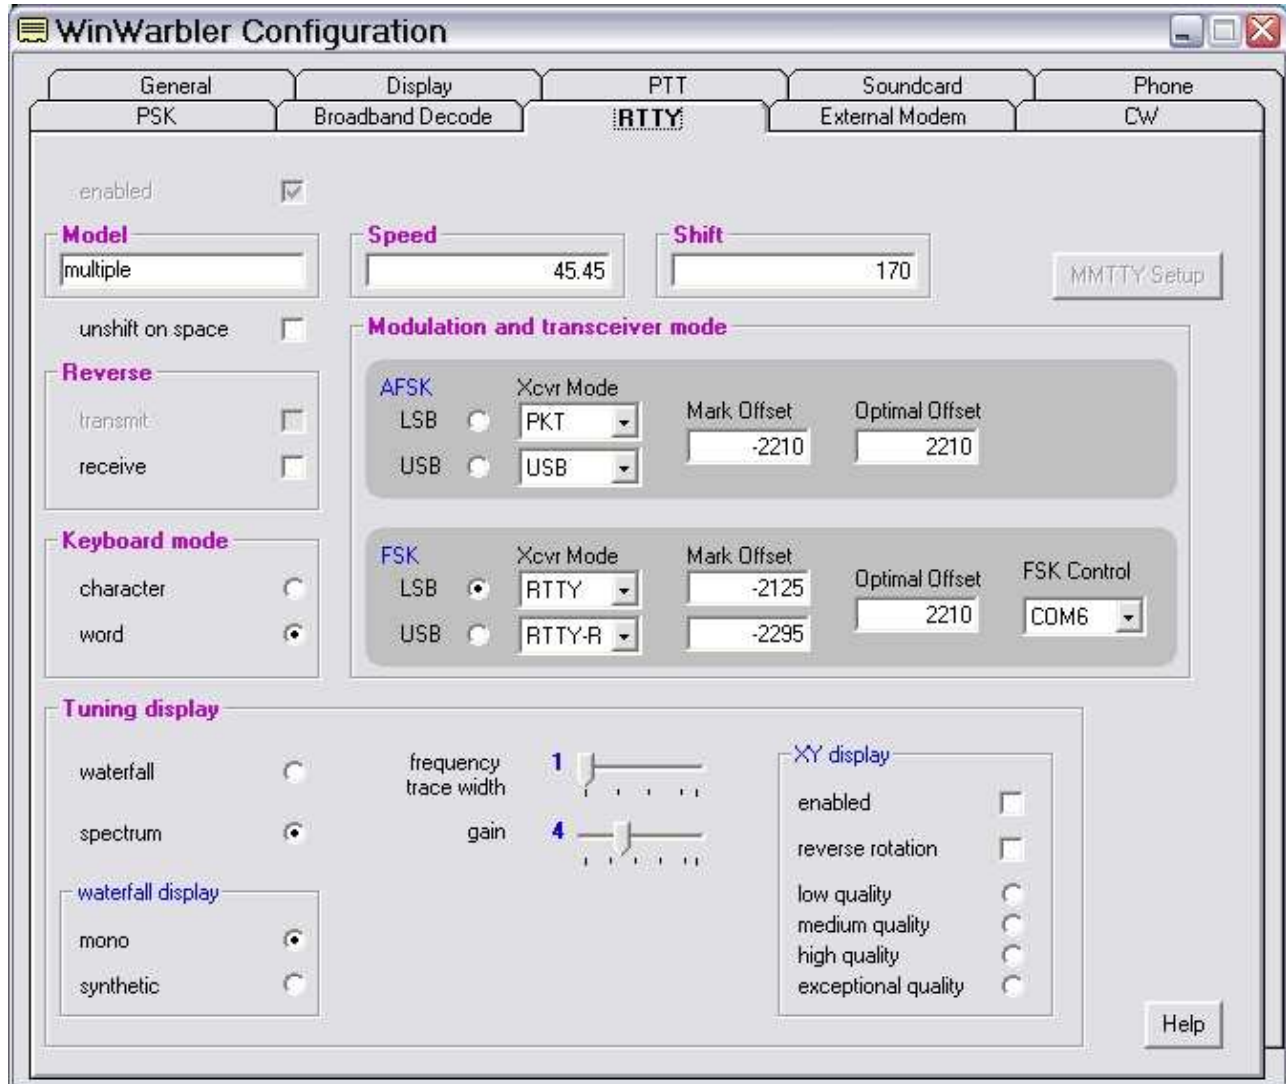

CW setup:

1. Switch WinWarbler to CW Mode

2. Open the WinWarbler's Configuration and select the **CW Tab**.

3. Select **Serial Port DTR** in the Keying box and set the Port that you chose for CW in Router.

4. Configure the settings you prefer for CW operation including weight, and PTT or QSK operation.
RTTY/MMTTY setup (FSK):

1. Switch WinWarbler to RTTY mode.

2. Click **Config** and select the **RTTY tab** ...

3. Configure the FSK Settings as needed by your radio

4. Set FSK Control to the port you selected for FSK in Router.

5. Click on the **MMTTY Setup** button ...

6. Select the **TX Tab ...**

7. Select the Port you configured for FSK in Router's Ports Tab in the PTT box.
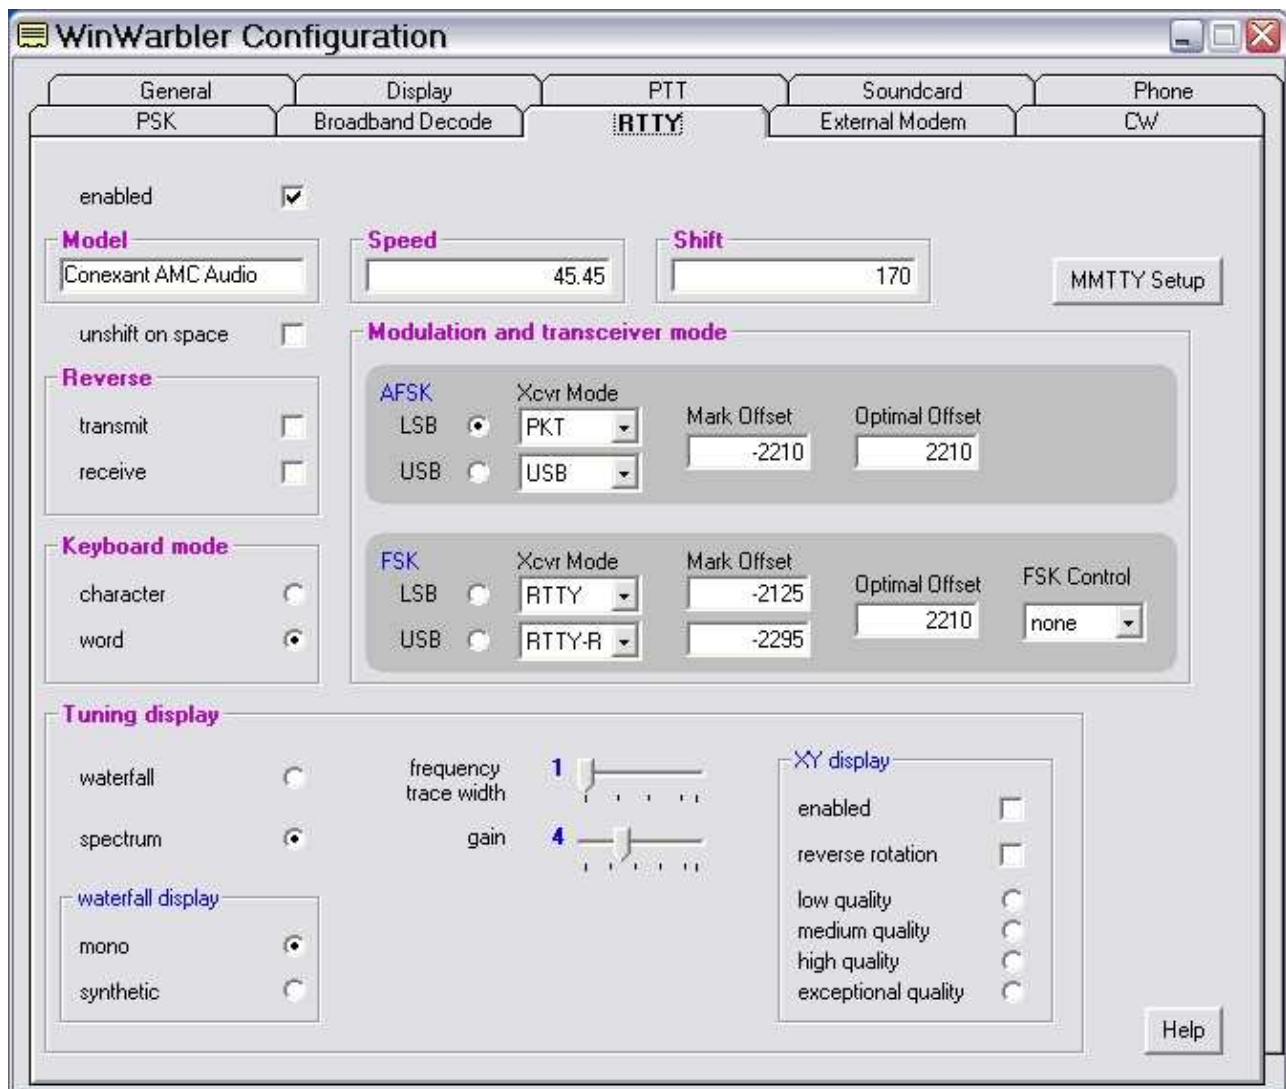

8. Select the **Misc Tab ...**

9. Select Source **Mono**

10. Set Clock **11025**

11. Select the proper sound card **Device ID**

12. To obtain the proper ID, click **Get ID** button at the Router **Keying** tab or from WinWarbler's **Soundcard** tab.

13. Select COM-TxD (FSK) for the TX Port. If you want the option to switch between AFSK and FSK, select Sound + COM-TxD (FSK)

14. Click **USB port** button and choose **C: Limiting speed**

RTTY/MMTTY setup (AFSK):

1. Switch WinWarbler to RTTY mode.

2. Click **Config** and select the **RTTY tab** ...

3. Configure the AFSK Settings required by your radio.

4. Set FSK Control to None

5. Click on the **MMTTY Setup** button ...

6. Select the **TX Tab ...**

7. Select NONE in the PTT Port box.

8. Choose the **Misc Tab.**

9. Select Source **Left**

10. Set Clock **11025**

11. Select the proper sound card **Device ID**

12. The Device ID is available from WinWarbler's **Soundcard** tab or by clicking the **Get ID** button on Router's **Keying** tab.

13. Select "Sound" as the TX Port.
